Tower Running Advanced Training Plan

Introduction

- The advance training plan is for those who race regularly in tower runs or other sports and push yourself to achieve results.
- The training plan covers a period of 16 weeks. 16 weeks out from the event starts w/c 22nd May.

How the Training Plan Works

- The plan combines a mixture of **cardio**, **step climbing**, **strength conditioning** and **rest**.
- **Monday, Wednesday and Saturday** involve **cardio** work. **Tuesday** focuses on **step climbing**. **Thursday** is all about **strength exercises**. **Friday and Sunday** are the all-important **rest days**.
- Training consistently is important, but we understand it's not always possible to follow the plan exactly. Aim to achieve at least 3 sessions per week, including 1 cardio and 1 stretching exercise.
- Warming up and down after your training is important to help prevent injury and ensure you perform to the best of your ability.
- Speak to your GP if you are unsure about starting this training plan or you develop an injury.

Training Plan Terminology Explained

- *Cardio at easy intensity*: this can be a walk, jog, bike ride or cross trainer at an intensity of 5-6/10.
- *Cardio at moderate intensity*: this can be a walk, jog, bike ride or cross trainer at an intensity of 6-7/10.
- *Cardio at high intensity*: this can be a walk, jog, bike ride or cross trainer at an intensity of 7-8/10.
- *Stair climb*: climb a set of at least 10 stairs, with a 30 second break between each set.
- *Strength 1 exercises*: these are a series of strengthening exercises for the first 1-8 weeks that can be found in the training section of the website.
- *Strength 2 exercises*: these are a series of strengthening exercises for the first 9-16 weeks that can be found in the training section of the website.

Best of luck with your training and we can't wait to see you on event day!
